This report supplements NPIC/R-151/63, 1/ which discusses the Dolina MRBM Complex, previously consisting of two Type I MRBM launch areas, one Type IV launch area, and associated rail-to-road transfer points.

The Dolina Fixed Field Site (Figure 1) is situated in a flat, thickly wooded plot 5 nautical miles (nm) southeast of Stryy and 1.7 nm east-northeast of Berezhnitsa in the Ukrainian SSR.

Both Dolina Launch Areas No 1 and 2 were complete when first identified on KEYHOLE photography of █. Launch

Area No 3, first observed in █ (Mission █, appeared to be complete in █. The fixed field site was not present in █ and was first observed in █ (Mission █

Launch Area No 1 is located 10.0 nm south-

southeast of the field site, Launch Area No 2 is located 9.5 nm to the southeast, and Launch Area No 3 is positioned 7.3 nm to the southwest. Launch Area No 1 is oriented on an azimuth of █ degrees, Launch Area No 2 on an azimuth of 200 degrees, and Launch Area No 3 on an azimuth of 275 degrees.

The fixed field site probably utilizes rail yards at Stryy for rail-to-road transfer of missile components and is linked to the other launch areas of the complex by good roads.

Dolina Fixed Field Site (Figure 2) consists of four connected padlike clearings, of which the two northern are oriented on azimuths of approximately 205 degrees and the two southern on azimuths of approximately 240 degrees. An unidentified object located on the southeastern padlike clearing appears to be oriented on an azimuth of 205 degrees.
